

Endress+Hauser joins the Eplan partner network

Provider-wide collaboration increases engineering efficiency

Solutions provider Eplan created a partner network that gives existing and new partnerships a framework for enhancing and marketing tool and software interfaces for engineering processes. Endress+Hauser has also become a member of the network with the goal of further intensifying the long-standing partnership.

Cloud solutions play a crucial role in the digital transformation, where it's becoming increasingly important that providers are able to collaborate with one another. With this in mind, Eplan kicked off 2021 by bundling the know-how of the participating companies in its partner network. "By professionalizing our network, we are systematically increasing the benefits for the end user," says Marco Litto, Senior Vice President Strategy & Corporate Program at Eplan.

"Growing numbers of customers need individual solutions, which is why there is such a high demand for engineering and planning services. The partner network makes it easier for us to address the needs of our customers and provide them with targeted support in the engineering process," says Boris Mann, project coordinator at Endress+Hauser. The new network defines binding tools for the further integration of tools and software along the value chain. Intensive exchange between the manufacturers simplifies integration of the wide range of systems employed by customers.

Engineering process efficiency

As one of the network's technology experts, Endress+Hauser has made its own product configurator technology available in the Eplan data portal. As a result, users can enjoy a central information platform that stretches from engineering to sales. Customers can use the platform to configure instruments with just a few steps and place an order if needed. In addition, all of the desired data, drawings and documents are available at the push of a button, all of which ensures the quality of the project documentation and makes the planning process more efficient.

The Endress+Hauser Group

Endress+Hauser is a global leader in measurement and automation technology for process and laboratory applications. The family company, headquartered in Reinach, Switzerland, achieved net sales of over 2.6 billion euros in 2019 with a total workforce of 14,000.

Endress+Hauser devices, solutions and services are at home in many industries. Customers thus use them to gain valuable knowledge from their applications. This enables them to improve their products, work economically and at the same time protect people and the environment.

Endress+Hauser is a reliable partner worldwide. Its own sales companies in 50 countries as well as representatives in another 70 countries ensure competent support. Production facilities on four continents manufacture quickly and flexibly to the highest quality standards.

Endress+Hauser was founded in 1953 by Georg H Endress and Ludwig Hauser. Ever since, the company has been pushing ahead with the development and use of innovative technologies, now helping to shape the industry's digital transformation. 8,000 patents and applications protect the Group's intellectual property.
